

## Traditional Poodle Clips

### Show Clips

usually bands are used in the coat on the head to help form the shape

English Saddle

Scandinavian

Continental

### Puppy show clips

Coats of poodles under 12 months are not long enough to shape into the adult show styles. The left image is more of an 'American puppy' style, with a slope scissored in to balance the outline where the neck hair is missing. The image on the right where there has been more of an attempt to create the adult 'mane' shape leaving a hole where there is not enough neck hair is more common in other countries.

Intermediate (sometimes seen at shows)

Modern

German  
(clipped tail & ears)

### Pet-type clips (not usually seen at shows)

not enough coat to assess texture

Gundog

Same length all over. Practical but tends to make dog look amorphous and unbalanced

Lamb

Summer  
(other names Clown, Miami, etc.)
